

WIRELESS HIGH CAPACITY OUTDOOR POINT TO POINT

POINT TO MULTIPOINT

Get the most reliable long range Wireless Backhaul solution up to 100 km, Wireless Outdoor High Capacity Point-to-Point bridge with capacity up to 10 Giga and high reliable wireless Point-to-Multipoint network solution for your CCTV real-time video-surveillance of remote facilities.

EC SYSTEM PtP and PtMP 3GHz, 5GHz and 6GHz, based on MIMO technology is designed for outdoor application with integrated antennas or external antennas.

Build your network with EC SYSTEM wireless optical link - Free space optics and get 10 Gigabits Full Duplex without digging and licenses Fast&Easy.

POINT-TO-POINT

- NLOS connectivity
- GSM/3G/LTE Backhaul
- Advanced network features
- VLAN
- Extended QoS
- L2/L3 Firewall
- Automatic Bitrate control
- Spectrum Analyzer mode
- Low latency
- Dust and water protection IP66,IP67
- Capacity up to 1 Gigabit

POINT-TO-MULTIPOINT

- Best performance
- Upgradable capacity
- Voice/RTP Aware Superpacketing
- Channel Adjustment
- Ethernet-over-IP tunneling
- MAC/IP filtering
- PoE for IP Cameras
- High reliable real-time data and video transfer from remote facilities
- Video-surveillance networks

FREE SPACE OPTICS

- Wireless optical Point to Point
- Low latency
- Up to 10 Gigabit FD
- Low latency
- Distance up to 15 km
- License free operation
- No digging
- Fast & Easy deployment
- The most secure connection
- Alternative to the Fibre
